

HARENDRA SINGH

Machine Learning Intern | Aspiring Data Scientist

☎ +91-8126391404 ✉ harendrabisht914@gmail.com www.linkedin.com/in/harendra-singh

Summary

Aspiring Data Scientist and Machine Learning Enthusiast with a strong foundation in data analysis, statistical modeling, and machine learning algorithms. Skilled in Python, SQL, and data visualization tools with hands-on experience in building predictive models and analyzing large datasets. Passionate about solving real-world problems using data-driven approaches and eager to contribute to ML/Data Science teams.

Education

University of Lucknow

Graduated 2026

Bachelor of Computer Applications (BCA) – Computer Science

CGPA: 8.4/10

- Relevant Coursework: Data Structures, Algorithms, Database Management, Statistics, Machine Learning
- Focus Areas: Data Analytics, Machine Learning, Business Intelligence, Statistical Analysis

Technical Skills

Programming Languages: Python, SQL, Java

Data Analysis & Visualization: Power BI, Microsoft Excel, Pandas, NumPy, Matplotlib, Seaborn

Machine Learning: Scikit-learn, TensorFlow, Regression, Classification, Clustering, Feature Engineering

Database Management: MySQL, PostgreSQL, Database Design, Query Optimization

Core Competencies: Data Cleaning, Model Training, Statistical Analysis, Predictive Modeling, Feature Engineering

Tools & Technologies: Git, Jupyter Notebook, VS Code, Docker

Experience

Data Analyst Intern

July 2025 – August 2025

Dataview Analytics (Remote)

Tools Used: Python, SQL, Power BI,

- * **Processed and standardized a dataset of over 1,00,000 rows** from multiple regions to support weekly analytics—enabled business teams to track KPIs across geography and time.
- * Designed smart Excel templates embedded with lookup functions and pivot logic, **saving 40% reporting time across 4 departments.**
- * Developed and maintained Power BI dashboards to visualize revenue trends, customer mix, and monthly performance—regularly used by managers and analysts across business units.
- * Collaborated with 4 analysts and 2 senior managers to define and validate 6 KPIs, improving report reliability and strategic alignment.

Projects

Smart Attendance System | *Deep Learning*

March 2026 – May 2026

- * Developed a real-time face recognition-based attendance system using deep learning and computer vision.
- * Implemented CNN-based face detection and recognition using OpenCV and TensorFlow/Keras.
- * Enabled students to mark attendance by capturing live images via webcam.
- * Applied image preprocessing techniques (resizing, normalization, face encoding) to improve model accuracy.
- * Automated attendance logging and stored records in a structured database (CSV/SQL).

House price prediction | *machine learning*

July 2025 – September 2025

- * Built a regression-based machine learning model to predict house prices using structured housing data.
- * Performed Exploratory Data Analysis (EDA) to identify key features influencing price (location, area, number of rooms).
- * Applied data preprocessing techniques including missing value handling, encoding categorical variables, and feature scaling.
- * Trained multiple models (Linear Regression, Decision Tree, Random Forest) and compared performance and evaluated models using R^2 Score, MAE, and RMSE to select the best-performing model.

Awards & Certifications

- **Complete Data Science and Machine Learning – GeeksforGeeks:** Completed so many practical case studies involving machine learning, data cleaning, data analysis, deep learning.
